

LIFTING CERTIFICATE

Corresponding permit no.

1 of 1

This certificate must be prepared by the same person who has prepared the WPCG Work Permit.

This certificate does not authorise any confined space entry, ground disturbance, work at height or hot work.

This certificate must be issued in conjunction with a WPCG Work Permit.

The validity period and authorisation of this certificate is aligned with the WPCG Work Permit.

Lifting Location

LIFT DETAILS

Specific lifting activities

Tools and equipment permitted

HAZARDS

Identify hazards that are present

Adjacent Plant Underground Services Site Assets Dropped Objects Pedestrians

Occupied Buildings Overhead Services Ground Conditions Inclement Weather Site Traffic

Lifting Of Personnel Large Sail Area Fragile Load Restricted Area Sharp Edges

Other (please specify)

LIFTING CONTROLS

GENERAL REQUIREMENTS

People appropriately trained and competent to perform lift

Qualifications of persons involved in the lift have been sighted by Permit Officer

Work area barricaded to restrict unauthorised access

Lay down area identified

Ground bearing capacity suitable for lifting device and load

Lifting device located on firm foundation and level surface

Create and maintain an exclusion zone below all overhead work

Lifting route clear of obstructions

Radius of the operation has been assessed

Lifting is outside of powerline exclusion zones as defined by local regulators

Log book verified to be on site

Method of communication between spotter/rigger and crane operator?

Verbal Hand signals Radio

LIFT PLAN

Lift plan in place Ref

The lift plan documents; the design of the load, activities involved in the lift, technical aspects and calculations, and the specific environmental characteristics

Lift is planned to be within 80% of the manufacturer's Load Chart Limit

EQUIPMENT

Crane and lifting equipment (e.g. soft slings, chains, etc.) to be inspected and maintained as per manufacturers specifications

Safety devices installed and to be confirmed operational prior to the lift. (e.g. anemometer, boom angle indicator, limiting and indicating devices)

Equipment documented on the lift plan to match that to be used on site

LOAD

Certified Lifting points on the load to be used for the lift

Slings to be used and can be wrapped easily around the load (no sharp edges, load not fragile etc)

Redundant sling to be fitted to workbox for lifting personnel

Guide ropes / tag lines to be used to guide load during lift

ADDITIONAL PRECAUTIONS, PPE AND CONTROLS

Describe any additional precautions, PPE and controls to be implemented
