Distances shown are based on the Classification of Hazardous Areas as contained in Australian Standard AS/NZS 60079.10.1:2009. This map does not contain every provision of the standards that may apply at a Service Station. For additional information, contractors should refer to the relevant part of AS/NZS 60079.10.1:2009

For work clearance purposes, work at any height within the site boundary that has the potential to cause an ignition source to enter this area will require the contractor to contact the company representative.
